

Data Collection and Preprocessing Phase

| Data Source | Data Quality Issue | Severity | Resolution Plan |
|-------------|--------------------|----------|---|
| Dataset | Image Variation | High | Collect images from diverse sources (different cameras, lighting conditions, angles). Implement data augmentation techniques (rotation, scaling, cropping) during preprocessing. |
| Dataset | Occlusion | Moderate | Include images with partial occlusion, and/or train the model to be robust to it. |

| | | | |
|---------|-------------------------|----------|---|
| Dataset | Insufficient Resolution | Moderate | Establish a minimum resolution threshold for images. Use superresolution techniques, if feasible, to enhance the resolution of some images. |
|---------|-------------------------|----------|---|

| Date | 19 April 2025 |
| Student Name | Rohit Mahadik |
| Project Title | Uncovering The Hidden Treasures Of The Mushroom Kingdom: A Classification Analysis |
| Maximum Marks | 2 Marks |

Data Quality Report Template

| | | | |
|---------|--------------------|------|--|
| Dataset | Unbalanced Classes | High | Employ stratified sampling to ensure proportional representation of each mushroom species. Use data augmentation for minority classes. Explore the use of weight loss functions during training. |
